ABSTRACT

Coronavirus Disease 2019 (COVID-19) is an infectious disease caused by Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2). The spread of the Corona virus which has spread to various parts of the world has an impact on the Indonesian economy, both in terms of trade, investment, tourism and the market is no exception. Healthy Market is the condition of the People's Market that is clean, safe, comfortable, and healthy through the fulfillment of Environmental Health Quality Standards, Health Requirements, as well as supporting facilities and infrastructure by prioritizing the independence of the market community.

This study aims to determine the handling of waste in Angkruksari Market, Donotirto, Kretek, Bantul during the Covid-19 pandemic. This type of research is descriptive method, namely research conducted to create a picture or describe a situation objectively.

The variables of this study for the availability of bathroom and toilet trash bins, the availability of garbage transport equipment, road access to TPS and the distance between TPS and market buildings have met the requirements. While the variable availability of trash bins in the parking area, TPS buildings are not waterproof, garbage transportation, garbage collection and Clean and Healthy Life Behavior (PHBS) do not meet the requirements.
