ABSTRAK

Latar belakang: Pengetahuan tentang karies gigi meliputi pengertian karies gigi, penyebab dan akibat karies, macam-macam karies menurut kedalamannya, proses terjadinya karies, dan cara mencegah karies gigi. Pencegahan karies gigi berdasarkan pada frekuensi dorongan, rangsangan pada diri individu dalam upaya pencegahan karies. Tujuan dari penelitian ini adalah untuk mengukur perilaku remaja karang taruna dalam upaya melakukan pencegahan karies.

Tujuan penelitian: Diketahuinya hubungan tingkat pengetahuan tentang karies gigi dengan perilaku pencegahan karies gigi pada remaja karang taruna

Metode penelitian: Jenis penelitian cross sectional. Variabel penelitian yaitu tingkat pengetahuan tentang karies gigi dan perilaku pencegahan karies gigi. Populasi adalah 36 remaja karang taruna dusun celep. Pengambilan sampel dengan teknik *purposive sampling* dengan jumlah sampel sebanyak 36 orang, pengumpulan data menggunakan kuesioner, analisis data menggunakan uji Kendall's Tau dengan SPSS

Hasil penelitian: Responden memiliki tingkat pengetahuan dengan kriteria baik sebanyak 35 (97,2%) dan perilaku pencegahan karies gigi dengan kriteria sedang sebanyak 21 (58,3%) responden. Terdapat hubungan antara tingkat pengetahuan dengan perilaku pencegahan karies gigi pada remaja

Kesimpulan: Terdapat hubungan antara tingkat pengetahuan dengan perilaku pencegahan karies gigi pada remaja, $p<0,311$

Kata kunci: Pengetahuan Karies, Perilaku Pencegahan Karies, Remaja

THE RELATIONSHIP BETWEEN KNOWLEDGE LEVEL OF DENTAL CARIES WITH PREVENTING BEHAVIOR OF DENTAL CARRIES IN TEENAGERS OF KARANG TARUNA
