ABSTRAK

Latar Belakang:Di Indonesia cakupan pelayanan kesehatan ibu hamil Kunjungan Keempat (K4) pada tahun 2019 sebesar 80 %,capaian tahun 2019 mencapai target sebesar 88,54%.sedangkan di tahun 2020 pelayanan kesehatan ibu hamil K4 menurun menjadi 76,84%.Kunjungan K4 di Puskesmas Oinlasi pada tahun 2018 sebanyak 41,3 %, tahun 2019 sebanyak 53,9 % dan padatahun 2020 sebanyak 68,5 % meskipun ada peningkatan tetap masih dibawah target kabupaten.

Tujuan Penelitian:Menganalisis faktor-faktor yang berhubungan dengan kepatuhan kunjungan K4 *antenatal care* di Puskesmas Oinlasi .

Metode Penelitian:Desain Penelitian kuantitatif, metode survey analitik pendekatan *crosssectional*. Penelitian dilaksanakan pada bulan September 2021 s/d bulan Juni tahun 2022. Populasi studi penelitian ini adalah ibu melahirkan 0-6 bulan di Oinlasi. Sampel penelitian sejumlah 103 ibu dengan instrument penelitian menggunakan kuesioner.Analisis data bivariat menggunakan uji *chisquared* dan analisis data multivariat menggunakan analisis regresi logistik.

Hasil Penelitian:Berdasarkan hasil analisis bivariat,tingkat pendidikan nilai $p=0,000$, tingkat pengetahuan nilai $p=0,000$, dukungan suami nilai $p=0,000$,keterjangkauan pelayanan kesehatan $p=0,000$, paparan media informasi nilai $p=0,000$.Hasil regresi logistik menunjukkan bahwa variabel dukungan suami memiliki nilai $Exp(B)$ paling besar yaitu 7.864. Dengan demikian, variabel dukungan suami merupakan faktor paling dominan yang berhubungan dengan kepatuhan kunjungan (K4) *antenatal care*.

Kesimpulan:Hasil analisis bivariat menunjukkan bahwa ada hubungan bermakna antara pengetahuan ibu,sikap ibu, dukungan suami, keterjangkauan pelayanan kesehatan dan paparan media informasi dengan kepatuhan kunjungan (K4) *antenatal care*.Variabel dukungan suami merupakan faktor paling dominan yang berhubungan dengan kepatuhan kunjungan K4 *antenatal care* di Puskesmas Oinlasi.

Kata Kunci: Kunjungan K4, dukungan suami

**FACTORS RELATED TO VISIT COMPLIANCE
(K4) ANTENATAL CARE
AT OINLASI HEALTH CENTER**

ABSTRACT

Background: *In Indonesia, the coverage of health services for pregnant women the fourth visit (K4) in 2019 was 80%, the 2019 achievement has reached the target of 88.54%. Meanwhile, in 2020 health services for pregnant women ANC decreased to 76.84%. ANC (K4) visits at the Oinlasi health center in 2018 were 41.3%, in 2019 it was 53.9% and in 2020 it was 68.5% although there was an increase, it was still below the district target.*

Research Objectives: *Analyzing related factors with obedience of antenatal care visits at Oinlasi Health Center.*

Research Methods: *Research design is quantitative, analytic survey with a cross-sectional approach. The study was conducted from September 2021 to June 2022. The population of this research study is mother who has done give birth 0-6 months in Oinlasi Health Center. The research sample is a total of 103 mothers with research instruments use questionnaire. Bivariate data analysis using chi-square test and analysis multivariate data use a logistic regression analysis.*

Research Results: *Based on the results of the bivariate analysis education level scored p -value = 0.000, mother's level of knowledge scored p -value = 0.000, husband's support scored p -value = 0.000, health service affordability scored p -value = 0.000, exposure to information media p -value = 0.000. The logistic regression results show that the husband's support variable has the greatest $\text{Exp}(B)$ value, which is 42,028. With this, the husband's support variable is the most dominant factor related to with obedience visit (K4) antenatal care.*

Conclusion : *The results of the bivariate analysis show that there is a meaningful connection between mother's knowledge, mother's attitude, husband's support, affordability service health and information media exposure with obedience visit of antenatal care. The husband's support variable is the most dominant factor related to with obedience antenatal care visits at the Oinlasi Health Center.*

KeyWords : *Visit (K4) antenatal Care, husband support.*
