ABSTRAK

Latar Belakang: Perkembangan teknologi informasi di dunia rekam medis mulai berkembang yang mulanya rekam medis manual bertransformasi menjadi Rekam Medis Elektronik. Implementasi Rekam Medis Elektronik dipergunakan sebagai strategi untuk meningkatkan kualitas pelayanan kesehatan seperti perbaikan alur kerja, mengatasi kendala dokumentasi klinis berbasis rekam medis manual yang mengalami banyak masalah dalam tuntutan pertukaran informasi antar penyedia layanan kesehatan.

Tujuan: Penelitian ini bertujuan untuk mengetahui pengetahuan dan sikap Perekam Medis dan Informasi Kesehatan dalam praktik penggunaan Rekam Medis Elektronik di Rumah Sakit Umum PKU Muhammadiyah Gamping Kabupaten Sleman.

Metode: Metode penelitian ini adalah deskriptif kuantitatif. Pengumpulan data dengan wawancara tidak terstruktur dan kuesioner. Populasi studi penelitian ini adalah seluruh petugas rekam medis di Rumah Sakit Umum PKU Muhammadiyah Gamping. Sampel dengan jumlah 25 orang. Analisis data menggunakan univariat.

Hasil: Keseluruhan pengetahuan responden pada kategori baik dalam praktik penggunaan Rekam Medis Elektronik sebanyak 25 orang (100%), sedangkan mayoritas sikap responden berada pada kategori cukup dalam praktik penggunaan Rekam Medis Elektronik sebanyak 14 orang (56%) dan baik dalam praktik penggunaan Rekam Medis Elektronik sebanyak 11 orang (44%).

Kesimpulan: Pengetahuan responden dalam praktik penggunaan Rekam Medis Elektronik secara keseluruhan sudah baik dan sikap responden dalam praktik penggunaan Rekam Medis Elektronik mayoritas berada pada kategori cukup, sehingga masih perlu dilakukan pelatihan untuk meningkatkan sikap demi menunjang pekerjaannya.

Kata Kunci: Pengetahuan, Sikap, Perekam Medis dan Informasi Kesehatan, Rekam Medis Elektronik

**REVIEW OF KNOWLEDGE AND ATTITUDES OF MEDICAL
RECORDERS AND HEALTH INFORMATION IN THE PRACTICE OF
USING ELECTRONIC MEDICAL RECORDS AT PKU MUHAMMADIYAH
GAMPING GENERAL HOSPITAL, SLEMAN DISTRICT**

ABSTRACT

Background: *The development of information technology in the world of medical records is starting to develop, from manual medical records being transformed into electronic medical records. Implementation of Electronic Medical Records is used as a strategy to improve the quality of health services such as improving workflow, overcoming obstacles to clinical documentation based on manual medical records which experience many problems in the demands of exchanging information between health service providers.*

Objective: *This study aims to determine the knowledge and attitudes of Medical Recorders and Health Information in the practice of using Electronic Medical Records at the PKU Muhammadiyah Gamping General Hospital, Sleman Regency.*

Methods: *This research method is quantitative descriptive. Data collection using unstructured interviews and questionnaires. The population of this research study were all medical record officers at the PKU Muhammadiyah Gamping General Hospital. Sample with a total of 25 people. Data analysis uses univariate.*

Results: *The overall knowledge of respondents in the good category in the practice of using Electronic Medical Records was 25 people (100%), while the majority of respondents' attitudes were in the sufficient category in the practice of using Electronic Medical Records as many as 14 people (56%) and good in the practice of using Electronic Medical Records as many as 11 people (44%).*

Conclusions: *The overall knowledge of respondents in the practice of using Electronic Medical Records is good and the majority of respondents' attitudes in the practice of using Electronic Medical Records are in the sufficient category, so training still needs to be carried out to improve attitudes to support their work.*

Keywords: *Knowledge, Attitudes, Medical Recorders and Health Information, Electronic Medical Records*
