## ABSTRAK

**Latar Belakang :** Terapis gigi dan mulut mempunyai kewenangan untuk melakukan pelayanan asuhan kesehatan gigi dan mulut yang terdiri dari upaya-upaya peningkatan kesehatan gigi dan mulut, pencegahan penyakit gigi dan mulut, manajemen pelayanan kesehatan gigi dan mulut, pelayanan kesehatan dasar pada kasus kesehatan gigi terbatas serta *dental assisting*. Kepatuhan Terapis Gigi dan mulut merupakan ketaatan atau ketidaktaatan pada perintah, aturan dan disiplin dalam melaksanakan tugas sesuai kewenangannya. Didapatkan 2,7 %, terapis gigi dan mulut yang masih kurang pengetahuannya tentang kewenangan klinis, sehingga kepatuhannya pun masih kurang dalam menjalankan pelayanan asuhan kesehatan gigi dan mulut di poli klinik gigi.

**Tujuan Penelitian :** Mengetahui hubungan pengetahuan kewenangan klinis terapis gigi dan mulut dengan kepatuhan menjalankan pelayanan asuhan kesehatan gigi dan mulut di poli klinik gigi

**Metode Penelitian :** Penelitian ini merupakan penelitian Deskriptif Korelasi, dengan desain *Cross Sectional*, dilakukan pada bulan September-November 2019. Populasi penelitian seluruh terapis gigi dan mulut di Kabupaten Sambas. Teknik pengambilan sampel dengan *total sampling* yang berjumlah 75 responden. Data dianalisis menggunakan uji *Kendall's Tau-b*.

**Hasil Penelitian :** Terapis gigi dan mulut memiliki tingkat pengetahuan tentang kewenangan klinis dalam kategori Pengetahuan yang baik dan kategori patuh. Hasil uji korelasi menunjukkan terdapat hubungan antara pengetahuan tentang kewenangan klinis dengan kepatuhan pelayanan asuhan. Dengan nilai signifikan  $p\text{-value}=0.028$

**Kesimpulan :** Dengan tingkat pengetahuan kewenangan klinis yang baik, maka terapis gigi dan mulut akan semakin patuh dalam menjalankan pelayanan asuhan kesehatan gigi dan mulut

**Kata Kunci :** kewenangan klinis, terapis gigi dan mulut, pelayanan asuhan kesehatan gigi dan mulut

# **The Relationship between the Knowledge of Clinical Authority of the Dental and Oral Therapists, and the Obedience with the Dental and Oral Healthcare Services in Dental Polyclinics**

## **Abstract**

**Background:** Dental and oral therapists have the authority to perform dental and oral healthcare services which consist of the efforts to improve the dental and oral health, the prevention of dental and oral diseases, the management of dental and oral health services, the basic health services in limited dental health cases, and the dental assisting. The obedience of Dental and mouth therapists is the obedience or disobedience to the orders, rules, and discipline in carrying out tasks according to their authorities. There were 2.7% of dental and oral therapists who had less knowledge about clinical authority, thus their obedience was still less in carrying out the dental and oral healthcare services in dental polyclinics.

**Research Objective:** To find out the relationship between the knowledge of clinical authority of the dental and oral therapists, and the obedience with the dental and oral healthcare services in dental polyclinics.

**Research Method:** This is a Correlational Descriptive Research, with the Cross-Sectional Design, and conducted in September to November 2019. The population on this research was all the dental and oral therapists in Sambas Regency. The Total Sampling was used for the sample collecting technique, along with 75 respondents. The data was analyzed using the Kendall's Tau-b Test.

**Research Results:** The dental and oral therapists' knowledge level about clinical authority was in the Good Knowledge Category, and Obedient Category. The correlation test results showed that there was a relationship between the knowledge of clinical authority and the obedience of healthcare services, with a significance value of  $p\text{-value} = 0.028$

**Conclusion:** The better the knowledge level of clinical authority, the more obedient the dental and oral therapists in carrying out their duties in healthcare services.

**Keywords:** clinical authority, dental and oral therapists, dental and oral healthcare services.
