### **ABSTRACT**

**Background :** Food receiving is an activity to control the quality and quantity of food ingredients. Animal based food is a food that is prone to damage either microbiological, mechanical, biological, physical, or chemical damage. Inaccuracies in the acceptance of food ingredients can affect the quality and quantity of animal side dishes.

**Objective :** To determine of receiving animal based food in the Nutrition Installation of Panembahan Senopati Bantul Hospital.

**Methods :** This study uses an observational method. The object of the study was all animal base food ingredients including processed products in a 10-days menu cycle at the nutritional installation of Panembahan Senopati Bantul Hospital. The variables of this study are the accuracy of animal side dishes, the number, specifications, and time of admission.

**Result :** Acceptance of food based on animal side dish 98.18% correct and 1.82% incorrect on the 4<sup>th</sup> menu because the ordered goods did not arrive. Based on the amount, 91.82% is right and 8.18% is not correct, that is, on the receipt of animal side dishes menu 4<sup>th</sup> , menu 7<sup>th</sup> , menu 8<sup>th</sup> , and menu 9<sup>th</sup> . Partner continue to complement the lack of food ingredients. Based on the specifications, 94.84% is appropriate while 5.16% incorrect, that is on the reception menu 1<sup>st</sup> , 2<sup>nd</sup> , 4<sup>th</sup> , 5<sup>th</sup> , 6<sup>th</sup> , 7<sup>th</sup> , 9<sup>th</sup> , 10<sup>th</sup>. Base on punctuality, 91.82% intime while 8.18% overtime on menus 4<sup>th</sup> , 7<sup>th</sup> , 8<sup>th</sup> , and menu 10<sup>th</sup> . That is because the goods arrive over the set time limit.

**Conclusion :** Acceptance of animal side dishes in the Nutrition Installation of Panembahan Senopati Bantul Hospital is appropriate.

**Keywords :** Food receiving, Animal based food, Acceptance accuracy

## **KAJIAN PENERIMAAN BAHAN MAKANAN LAUK HEWANI DI INSTALASI GIZI RSUD PANEMBAHAN SENOPATI BANTUL**

### **ABSTRAK**

**Latar Belakang :** Penerimaan bahan makanan adalah kegiatan untuk mengontrol kualitas dan kuantitas bahan makanan. Bahan makanan hewani merupakan bahan yang rawan terhadap kerusakan, baik kerusakan mikrobiologis, mekanis, biologis, fisik, dan kimia. Ketidaktepatan pada penerimaan bahan makanan dapat mempengaruhi kualitas dan kuantitas lauk hewani.

**Tujuan Penelitian :** Mengetahui penerimaan bahan makanan lauk hewani di Instalasi Gizi RSUD Panembahan Senopati Bantul.

**Metode Penelitian :** Penelitian ini menggunakan metode observasional. Obyek penelitian adalah semua bahan makanan lauk hewani termasuk hasil olahannya dalam 1 siklus menu 10 hari di instalasi gizi RSUD Panembahan Senopati Bantul. Variabel penelitian ini yaitu ketepatan jenis lauk hewani, jumlah, spesifikasi, dan waktu penerimaan.

**Hasil Penelitian :** Penerimaan bahan makanan berdasarkan jenis lauk hewani 98.18 % tepat dan 1.82 % tidak tepat yaitu pada menu ke IV karena barang yang dipesan tidak datang. Berdasarkan jumlah, 91.82 % tepat dan 8.18 % tidak tepat yaitu pada penerimaan bahan makanan lauk hewani menu IV, menu VII, menu VIII, serta menu IX. Pihak rekanan tetap melengkapi bahan makanan yang kurang. Berdasarkan spesifikasi, 94.84 % barang yang datang tepat dan 5.16 % tidak tepat yaitu pada penerimaan menu I, II, IV, V, VI, VII, IX, X. Berdasarkan waktu pada penerimaan bahan makanan, 91.82 % tepat dan 8.18 % tidak tepat yaitu pada menu IV, VII, VIII, dan menu X. Hal tersebut dikarenakan barang datang melebihi batas waktu yang ditetapkan.

**Kesimpulan Penelitian :** Penerimaan bahan makanan lauk hewani di instalasi gizi RSUD Panembahan Senopati Bantul sudah tepat.

**Kata Kunci :** Penerimaan bahan makanan, Lauk Hewani, Ketepatan Penerimaan
