ABSTRAK

Latar belakang: Permasalahan sampah dikawasan perkotaan disebabkan beberapa parameter yang saling berkaitan, yaitu pertumbuhan penduduk, pertumbuhan ekonomi, pola konsumsi masyarakat, perilaku penduduk, kepadatan penduduk dan bangunan. Timbulan sampah masih menjadi masalah besar bagi lingkungan meski itu sampah yang diklaim ramah lingkungan tidak lagi mendukungnya. **Tujuan:** Mengetahui pengaruh penyuluhan terhadap pengurangan timbulan sampah. **Metodologi:** Menggunakan review literature dengan pencarian jurnal melalui jaringan internet dengan peramban Google dan Google scholar untuk menemukan jurnal/artikel sesuai kriteria inklusi atau eksklusi kemudian dilakukan review. **Hasil:** Hasil dari review literatur didapatkan dengan berbagai penyuluhan dan timbulan sampah berhasil membawa dampak positif bagi masyarakat tetapi beberapa jurnal masih belum berhasil dikarenakan masyarakat belum sadar bahaya timbulan sampah dan masyarakat tidak mempunyai waktu dalam mengelola sampah di lingkungan. **Kesimpulan:** Berdasarkan hasil jurnal yang direview, dapat disimpulkan bahwa melakukan pengurangan sampah baik organik maupun anorganik dapat dikelola dengan berbagai cara agar dapat asalkan masyarakat sadar akan pentingnya pengelolaan sampah disekitar lingkungannya.

Kata Kunci: Penyuluhan, timbulan sampah, Literature review

THE EFFECT OF EXTENSION TOWARDS REDUCTION OF WASTE ARIS

ABSTRACT

Background: The problem of garbage in urban areas is due to several interrelated parameters, namely population growth, economic growth, community consumption patterns, population behavior, population density and buildings. Waste generation is still a big problem for the environment, even though it is claimed that environmentally friendly waste no longer supports it. **Objective:** To determine the effect of education on reducing waste generation. **Methodology:** Using literature review by searching journals through internet network with Google browser and Google scholar to find journals / articles according to inclusion and exclusion criteria then reviewing them. **Results:** The results of the literature review were obtained with a variety of counseling and solid waste generation had a positive impact on the community but some journals were still unsuccessful because the community was not aware of the danger of waste generation and the community did not have time to manage waste in the environment. **Conclusion:** Based on the results of the reviewed journals, it can be concluded that reducing waste both organic and inorganic can be managed in various ways so as long as the community is aware of the importance of waste management around their environment.
