10 Aug 2017 05:57	Knowledge and Skills of Young Adolescents to Refuse Substances	Conference or Workshop Item	Live Archive	The substance users were young adolescent (5.35%). Although the percentage of substance users in young adolescent is relatively small when compared with smokers (69.15%) and alcohol users (13.48%), but the danger for young adolescent is more serious than the other two behaviors. The Indonesian National Narcotics Agency (BNN) data show an increase for substance users : 2.6 million people (2008); 4.7 million people (2015). Substance effects deteriorate one's health physically, mentally and emotionally. Indonesian Ministry of Health Degree Act number 1529/MoH/SK/X/2010 stated: 31 behaviors that should be practiced in rural communities and active alert district known as clean and healthy lifestyle behavior (PHBS). The number 26 :no smoking, drinking liquor (alcohol).
