ABSTRACT

Background : Surgery Surgical Checklist as a tool used by clinicians in the operating room to improve operating safety, reduce deaths and complications resulting from surgery so that compliance is required in the implementation of the documentation. Compliance nurse is a nurse's behavior as a professional against a recommendation, procedures or rules that have to be done or complied

Research purposes : Knowing the factors of education, knowledge, motivation, length of employment, attitude, and age-related compliance documentation implementation Surgery Surgical Checklist.

Research methods : This research is quantitative research with analytic observational research. The experiment was conducted in March - April 2018. The subject of research is the nurse anesthetist / anesthetic stylists who work in Wates Hospital, Kota Yogyakarta Hospital, Wonosari hospital, Sleman hospitals amounted to 26 respondents. The test used was Spearman Rank the variables of education, knowledge, motivation, attitude, length of employment and Kolmogorov-Smirnov at variable ages.

Research result : From the results of the analysis show knowledge ($p < 0.020$) education ($p > 0.841$), motivation ($p > 0.871$), length of employment ($p > 0.109$), attitude ($p > 0.279$) and age ($p > 1$).

Conclusion: There is a relationship between knowledge with the implementation of the compliance documentation surgery surgical checklist, whereas there is no relation between education, motivation, length of employment, attitude, age at surgery surgical checklist documentation implementation.

Keywords : Surgery Surgical Checklist, obedience

ABSTRAK

Latar Belakang : *Surgical Surgery Checklist* sebagai *tool*/alat yang digunakan oleh para klinisi di kamar bedah untuk meningkatkan keamanan operasi, mengurangi kematian dan komplikasi akibat pembedahan. Kepatuhan perawat adalah perilaku perawat sebagai seorang yang profesional terhadap suatu anjuran, prosedur atau aturan yang harus dilakukan atau ditaati

Tujuan Penelitian : Mengetahui faktor pendidikan, pengetahuan, motivasi, masa kerja, sikap, dan usia yang berhubungan dengan kepatuhan pelaksanaan pendokumentasian *Surgical Surgery Checklist*.

Metode Penelitian : Penelitian ini adalah penelitian kuantitatif dengan jenis penelitian *observasional analitik*. Penelitian dilaksanakan pada bulan Maret–April 2018. Subjek penelitiannya adalah perawat anestesi/penata anestesi yang bekerja di RSUD Wates, RSUD Kota Yogyakarta, RSUD Wonosari, RSUD Sleman berjumlah 26 responden. Uji yang digunakan adalah *Spearman's Rho* pada variabel pendidikan, pengetahuan, motivasi, sikap, masa kerja dan *Kolmogorov Smirnov Z* pada variabel usia.

Hasil Penelitian : Dari hasil analisa menunjukkan pengetahuan ($p < 0,020$) pendidikan ($p > 0,841$), motivasi ($p > 0,871$), masa kerja ($p > 0,109$), sikap ($p > 0,279$), dan usia ($p > 1$).

Kesimpulan : Terdapat hubungan antara pengetahuan dengan kepatuhan pelaksanaan pendokumentasian *surgical surgery checklist*, sedangkan tidak terdapat hubungan pendidikan, motivasi, masa kerja, sikap, usia dengan pelaksanaan pendokumentasian *surgical surgery checklist*.

Kata Kunci : *Surgical Surgery Checklist*, kepatuhan
