INTISARI

Latar Belakang: Orang dewasa *down syndrome* mengalami penurunan kesehatan dan fungsi organ sejak usia 40-an, sedangkan orangtua umumnya usia 70-an atau 80-an. Penderita *down syndrome* membutuhkan perawatan seumur hidup dan keluarga berperan penting supaya berdampak positif pada penderita *down syndrome*. Laporan Dinas Kesehatan Kabupaten Kulon Progo tahun 2020 dari januari hingga oktober ada 25. Laporan Puskesmas Nanggulan tahun 2019, total ada 2 kasus penderita kelainan kromosom sedangkan yang memeriksakan diri sebanyak 10 kunjungan. Wawancara dengan kader kesehatan di Desa Jatisarono yaitu penderita *down syndrome* terdiri dari berbagai macam usia, salah satunya laki-laki berusia 49 tahun yang membutuhkan bantuan selama 24 jam.

Tujuan Studi Kasus: Memberikan asuhan keperawatan keluarga dengan pendekatan proses asuhan keperawatan keluarga pada kelainan *down syndrome* di wilayah kerja Desa Jatisarono Kecamatan Nanggulan.

Metode Studi Kasus: Karya Tulis ini menggunakan metode deskriptif studi kasus asuhan keperawatan yang meliputi: pengkajian, perumusan diagnosis keperawatan, perencanaan, implementasi, dan evaluasi.

Hasil: Dari asuhan keperawatan yang diberikan pada keluarga dengan penderita *down syndrome* didapatkan empat diagnosis keperawatan yaitu Defisit perawatan diri: mandi, berpakaian, makan, *toileting*, berhias, Gangguan komunikasi verbal, Risiko cedera, dan Kesiapan peningkatan coping keluarga.

Kesimpulan: Menerapkan proses asuhan keperawatan keluarga, mendokumentasikan, serta mengidentifikasi faktor pendukung dan penghambat dalam melaksanakan asuhan keperawatan keluarga dengan *down syndrome* di Desa Jatisarono Kecamatan Nanggulan.

Kata kunci: Asuhan keperawatan keluarga, *down syndrome*
