ABSTRACT

Background: Public awareness for independent plan parenthood during the COVID-19 pandemic period is still low, one of which can be seen from the decrease in the number of injected contraceptive participants. Unregularly examination of plan parenthood was caused by many of acceptor mothers felt worried and anxious due to COVID-19 pandemic.

Objective: this research is conducted to determine the correlation between Anxiety Relationship With The Accuracy of Recitations of Progestin Injecting KB Acceptors During The Covid -19 Pandemic at the Pratama Clinic of PMI DIY.

Methods: This research was an analytic survey research with cross sectional design. Independent variable was anxiety during the COVID-19 pandemic period, while dependent variable was punctuality of revisiting of the progestin injected contraceptive acceptors. Population of the research was acceptors of progestin injected contraceptive at the Clinic of Pratama PMI DIY with the research sample of 70 plan parenthood acceptors. Data collection used primary data and secondary data. Research instrument was questionnaire in form of google form. Data analysis used chi square test.

Results: most of the respondents were 20-35 years old, educations level of the respondents was high school, and most of the respondents were employee. Plan parenthood acceptors who were anxious with the punctuality of revisiting of the progestin injected contraceptive acceptors were not punctual of 30 (58.8%), and who were anxious with the punctuality of revisiting of the progestin injected contraceptive acceptors punctual were punctual of 21 (41,2%). Plan parenthood acceptors who were not anxious with the punctuality of revisiting of the progestin injected contraceptive acceptors were not punctual of 5(26.38%) and not anxious with the punctuality of revisiting of the progestin injected contraceptive acceptors were punctual of 14 (73.7%). Chi Square got significance value of 0.032 ($p < 5\%$).

conclusion: there was correlation between Anxiety Relationship With The Accuracy of Recitations of Progestin Injecting KB Acceptors During The Covid - 19 Pandemic at the Pratama Clinic of PMI DIY

keywords: anxiety, Accuracy of Recitations, progestin injected KB acceptors

HUBUNGAN KECEMASAN DENGAN KETEPATAN KUNJUNGAN ULANG AKSEPTOR KB SUNTIK PROGESTIN PADA MASA PENDEMI *COVID-19* DI KLINIK PRATAMA PMI DIY

ABSTRAK

Latar Belakang: Kesadaran masyarakat untuk KB mandiri selama masa pandemic masih rendah, salah satunya terlihat dari penurunan jumlah peserta KB suntik. pemeriksaan KB secara tidak dilakukan secara rutin, disebabkan banyak ibu akseptor yang khawatir dan cemas akibat pandemic covid-19.

Tujuan: Untuk mengetahui hubungan kecemasan dengan ketepatan kunjungan ulang akseptor KB suntik progestin pada masa pandemi *Covid-19* di Klinik Pratama PMI DIY.

Metode: Jenis penelitian yang diambil adalah penelitian suvey analitik dengan desain *cross sectional*. Variabel bebas kecemasan pada masa pandemi *Covid-19* sedangkan variabel terikat ketepatan kunjungan ulang akseptor KB suntik progestin. Populasi dari penelitian ini adalah 97 akseptor KB suntik progestin di Klinik Pratama PMI DIY dengan sampel penelitian sebanyak 70 akseptor KB. Pengumpulan data menggunakan data primer dan data sekunder. Instrument penelitian menggunakan kuesioner dalam bentuk google form. Analisis data menggunakan uji *chi square*.

Hasil: Karakteristik responden penelitian sebagian besar usia berusia 20-35 tahun, pendidikan terakhir responden SMA, sebagian besar responden dan bekerja. Absektor KB terjadi kecemasan dengan ketepatan kunjungan ulang akseptor KB Suntik Progestin tidak tepat sebanyak 30 (58,8%) dan terjadi kecemasan dengan Ketepatan kunjungan ulang akseptor KB suntik progestin tepat sebanyak 21 (41,2%). Absektor KB dengan kriteria Tidak cemas dengan Ketepatan kunjungan ulang akseptor KB Suntik Progestin tidak tepat sebanyak 5(26,3,8%) dan tidak cemas dengan ketepatan kunjungan ulang akseptor KB Suntik Progestin tepat sebanyak 14 (73,7%). *Chi Square* diperoleh nilai signifikansi 0,032 ($p < 5\%$)

Kesimpulan: Ada hubungan kecemasan dengan ketepatan kunjungan ulang akseptor KB suntik progestin pada masa pandemi *Covid-19* di Klinik Pratama PMI DIY.

Kata kunci: Kecemasan, Ketepatan Kunjungan, Akseptor KB Suntik Progestin
