Abstrak

Penilaian capaian pemantauan pertumbuhan balita yang dilakukan di Puskesmas Gerung, Lombok Barat menunjukkan bahwa 78,7% kader posyandu tidak mengetahui definisi N/D dan hampir semua kader posyandu masih keliru mengartikan N dengan tepat. SKDN merupakan instrument vital dalam menggambarkan kegiatan posyandu dan pemantauan tumbuh kembang balita. Penelitian ini bertujuan untuk mengkaji pengetahuan kader posyandu tentang pengertian dan interpretasi capaian SKDN di Desa Sumpersari. Jenis penelitian ini merupakan penelitian observasional dengan pendekatan cross sectional. Hasil penelitian menunjukkan pengetahuan kader dengan kategori baik sebanyak 13 orang (50%), pengetahuan kader tentang pengertian SKDN dengan kategori kurang sebanyak 6 orang (23%), pengetahuan kader tentang pengertian SKDN mayoritas dengan kategori kurang sebanyak 16 orang (61,5%). Kesimpulan dalam penelitian ini adalah pengetahuan kader posyandu tentang pengertian dan interpretasi capaian SKDN adalah dari 20 orang yang memiliki kategori pengetahuan baik tentang pengertian yang mana 12 orang (46,2%) memiliki pengetahuan dalam kategori kurang tentang interpretasi capaian.

Kata kunci : pengetahuan, kader posyandu, pemantauan pertumbuhan balita

Study Of Knowledge Posyandu Cadres About Definition And Intepretation of SKDN Achievement in Posyandu Desa Summersari, Moyudan, Sleman, DIY.

Abstract

The assessment of growth monitoring achievement towards under- five children conducted in Puskesmas Gerung, Lombok Barat shows that 78,7 % posyandu cadres do not know the definition of N/D, and almost all posyandu cadres still erroneously to imply the N properly. SKDN is vital instrument to describe posyandu activities and monitor the under-five children growth. This study aims to assess knowledge of posyandu cadres about definition and interpretation of SKDN achievements in Desa Summersari. This research belongs to observasional study with cross sectional approach. The research results shows that 13 cadres (50%) had good knowledge, however, there were 6 people (23%) who had less knowledge about the definition of SKDN and posyandu cadres who had less knowledge about the definition of majority SKDN were 16 people (61.5%). Hence, this research concludes that knowledge of the posyandu cadres about definition and interpretation achievements of these SKDN is from 20 people who had good knowledge about definition SKDN there were 12 people (46,2%) who had less knowledge about interpretation of SKDN achievements.
