ABSTRAK

Latar Belakang: Pemantauan pertumbuhan balita di Kota Solok, yaitu balita yang datang ditimbang (D/S) terjadi penurunan tajam di bulan April tahun 2020 yaitu dari 4054 balita yang ditimbang (Maret tahun 2020) turun menjadi 384 balita yang ditimbang (April tahun 2020). Kemudian naik lagi pada bulan Mei secara perlahan dan naik secara tajam di bulan Agustus. Penurunan di bulan April diketahui karena masyarakat mengalami syok dan ketakutan atas munculnya kasus positif Covid-19 di bulan Maret.

Tujuan: Menganalisis determinan faktor kepatuhan kunjungan ke posyandu pada ibu balita di masa pandemi Covid-19 di Puskesmas Tanjung Paku Kota Solok Sumatera Barat

Metode: Jenis penelitian yang digunakan adalah observasional kuantitatif. Desain penelitian dalam penelitian ini adalah *cross sectional* yaitu dengan mendapatkan data pengetahuan, sikap, dan dukungan keluarga terhadap kunjungan balita ke posyandu dikumpulkan dalam waktu yang bersamaan. Jumlah sampel yang digunakan yaitu sebanyak 96 responden dan memenuhi kriteria inklusi. Instrumen penelitian yang digunakan adalah kuesioner. Analisis data menggunakan analisis univariat dan analisis bivariat, *chi square* dan analisis multivariat

Hasil: Variabel pengetahuan ibu, dukungan keluarga ibu memiliki pengaruh langsung yang positif dan signifikan terhadap kepatuhan kunjungan balita ke posyandu pada masa pandemic covid-19, dinyatakan dengan p value <0,05. Pengetahuan ibu terhadap kepatuhan kunjungan balita ke posyandu (p=0,004) dan dukungan keluarga terhadap kepatuhan kunjungan balita ke posyandu (p=0,006) Sedangkan pengetahuan ibu tentang covid-19 dan sikap ibu balita tidak memiliki pengaruh langsung terhadap kepatuhan kunjungan balita ke posyandu di masa pandemic covid-19, dinyatakan dengan p value > 0,05. Pengetahuan ibu tentang covid-19 (p=0,807) dan sikap ibu terhadap kepatuhan kunjungan balita ke posyandu (p=0,0880)

Kesimpulan: Ada pengaruh yang signifikan antara variabel pengetahuan ibu, dukungan keluarga terhadap kepatuhan kunjungan balita ke posyandu pada masa pandemi covid-19 sedangkan variabel pengetahuan ibu balita tentang covid-19 dan sikap ibu balita tidak memiliki pengaruh yang signifikan terhadap kepatuhan kunjungan balita ke posyandu pada masa pandemic covid-19

ABSTRACT

Background: Monitoring the growth of toddlers in Solok City, namely toddlers who came to be weighed (D/S) there was a sharp decline in April 2020, from 4054 toddlers who were weighed (March 2020) down to 384 toddlers who were weighed (April 2020). Then it rises again in May slowly and rises sharply in August. The decline in April was known because people were in shock and fear over the emergence of positive cases of Covid-19 in March.

Objective: Analyzing the determinants of compliance factors for visits to posyandu for mothers of toddlers during the Covid-19 pandemic at the Tanjung Paku Health Center, Solok City, West Sumatra

Methods: The type of research used is observational quantitative. The research design in this study was cross sectional, namely by obtaining data on knowledge, attitudes, and family support for toddlers' visits to posyandu collected at the same time. The number of samples used were 96 respondents and met the inclusion criteria. The research instrument used was a questionnaire. Data analysis used univariate analysis and bivariate analysis, chi square and multivariate analysis

Results: Mother's knowledge variable, mother's family support has a positive and significant direct influence on the compliance of toddlers' visits to posyandu during the covid-19 pandemic, indicated by p value <0.05. Mother's knowledge of compliance with toddlers' visits to posyandu (p=0.004) and family support of toddlers' visits to posyandu (p=0.006) Meanwhile, mothers' knowledge of COVID-19 and attitudes of mothers of toddlers did not have a direct influence on adherence to visits by toddlers to posyandu in their childhood. the covid-19 pandemic, expressed by p value > 0.05. Mother's knowledge about covid-19 (p=0,807) and mother's attitude towards compliance with toddler visits to posyandu (p=0.0880)

Conclusion: There is a significant influence between the variables of mother's knowledge, family support on the compliance of toddlers' visits to the posyandu during the covid-19 pandemic, while the variables of mothers' knowledge of toddlers about covid-19 and the attitudes of mothers of toddlers do not have a significant influence on compliance with toddlers' visits to posyandu during the pandemic. covid-19
