School institutions are public places in which there are many activities and individuals so that health and sanitation in the school environment must be considered so as not to cause health problems. The purpose of this study was to determine the sanitation condition of the Pulogebang 01 East Jakarta Public Elementary School in 2021. This study was a descriptive study with data collection methods of observation, interviews and documentation referring to the Decree of the Minister of Health No. 1429 of 2006. The objects of this research include the physical building, building space, clean water supply, toilets, waste water disposal facilities, temporary waste disposal sites, room air quality, ventilation, lighting, noise, sports and worship facilities, yard and free of larvae in SDN Pulogebang 01 East Jakarta.

The results of the sanitation assessment referring to Kepmenkes No. 1429 Year 2006 at the Pulogebang 01 State Elementary School, East Jakarta, got a score of 79% in the healthy worthy category. With the description of the physical assessment of the building 100%, the condition of the building space 61.5%, 100% clean water supply, 85.7% toilets, 50% waste water disposal facilities, 0% temporary waste disposal sites, 0% indoor air quality, 67 ventilation %, lighting 50%, noise 0%, sports and worship facilities 100%, pages 100% and 100% free of larvae. Recommendations from researchers are that schools can establish smoke-free areas, change types of lights and plant trees to reduce noise.

Key words : sanitation, school sanitation

Institusi sekolah merupakan tempat umum yang didalamnya terdapat banyak kegiatan dan individu sehingga kesehatan dan sanitasi di lingkungan sekolah harus diperhatikan agar tidak menimbulkan masalah kesehatan. Tujuan penelitian ini adalah untuk mengetahui kondisi sanitasi Sekolah Dasar Negeri Pulogebang 01 Jakarta Timur pada tahun 2021. Penelitian ini merupakan penelitian deskriptif dengan metode pengumpulan data observasi, wawancara dan dokumentasi yang mengacu pada Kepmenkes No. 1429 Tahun 2006. Objek penelitian ini meliputi fisik bangunan, ruang bangunan, penyediaan air bersih, toilet, sarana pembuangan air limbah, tempat pembuangan sampah sementara, kualitas udara ruang, ventilasi, pencahayaan, kebisingan, sarana olahraga dan ibadah, halaman dan bebas jentik di SDN Pulogebang 01 Jakarta Timur.

Hasil penilaian sanitasi yang merujuk pada Kepmenkes No. 1429 Tahun 2006 di Sekolah Dasar Negeri Pulogebang 01 Jakarta Timur mendapatkan nilai 79% dengan kategori laik sehat. Dengan penjabaran penilaian fisik bangunan 100%, kondisi ruang bangunan 61,5%, penyediaan air bersih 100%, toilet 85,7%, sarana pembuangan air limbah 50%, tempat pembuangan sampah sementara 0%, kualitas udara ruang 0%, ventilasi 67%, pencahayaan 50%, kebisingan 0%, sarana olahraga dan ibadah 100%, halaman 100% dan bebas jentik 100%. Rekomendasi dari peneliti bahwa pihak sekolah dapat menetapkan kawasan bebas asap rokok, mengganti jenis lampu dan menanam pepohonan agar meredam kebisingan.

Kata Kunci : sanitasi, sanitasi sekolah
