ASUHAN KEBIDANAN FSIOLOGIS HOLISTIK BERKESINAMBUNGAN

(CONTINUITY OF CARE) PADA NY. R USIA 29 TAHUN G1P0A0 DI UPT PUSKESMAS BAYAN KABUPATEN PURWOREJO

Latar Belakang : Jumlah kasus kematian bayi dan ibu di Jawa Tengah hingga 30 Juni 2017 masih tinggi, yaitu 2.182 kasus kematian bayi dan 215 kasus kematian ibu. Salah satu strategi Pemerintah Provinsi Jawa Tengah untuk mengatasi hal tersebut yaitu dengan melaksanakan program *One Student One Client* (OSOC) yang merupakan model pelayanan kesehatan asuhan kebidanan dengan melibatkan satu mahasiswa untuk mendampingi satu klien dari masa kehamilan, persalinan, nifas, neonatus, dan keluarga berencana (KB). **Tujuan** : Melakukan Pengkajian dan Menerapkan Asuhan Kebidanan secara berkesinambungan pada Ny. R Usia 29 Tahun G1P0A0 di UPT Puskesmas Bayan sesuai standar pelayanan kebidanan pada ibu hamil, bersalin, nifas, dan bayi baru lahir dengan mengacu pada KEPMENKES No.938/ MENKES/ SK/ VII/ 2007 tentang Standar Asuhan Kebidanan. **Metode** : analisis SOAP (data subjektif, objektif, *assessment, planning*). **Hasil** : Ny. R usia 29 tahun kehamilan normal, proses persalinan normal dan spontan, tidak ada penyulit bagi ibu dan bayi, asuhan kebidanan bayi baru lahir dan ibu nifas berjalan baik tanpa komplikasi, masa neonatus berlangsung normal, serta telah dilakukan asuhan kebidanan keluarga berencana (KB) suntik 3 bulan. **Kesimpulan** : Asuhan Kebidanan Berkesinambungan kepada Ny. R usia 29 tahun di UPT Puskesmas Bayan telah dilaksanakan sesuai standar pelayanan kebidanan pada ibu hamil, bersalin, nifas, bayi baru lahir, dan KB dengan mengacu pada KEPMENKES No.938/ MENKES/ SK/ VII/ 2007 tentang Standar Asuhan Kebidanan.

ABSTRACT

GITA GHANDI ARIESTIANI

CONTINUITY OF CARE CONTINUITY OF CARE IN NY. R AGE 29 YEARS
G1P0A0 AT UPT PUSKESMAS BAYAN PURWOREJO REGENCY

Background : The number of cases of infant and maternal mortality in Central Java as of June 30, 2017 is still high, namely 2,182 infant deaths and 215 maternal deaths. One of the strategies of the Central Java Provincial Government to overcome this is by implementing the One Student One Client (OSOC) program which is a model of midwifery care health services by involving one student to accompany one client from pregnancy, childbirth, postpartum, neonates, and family planning. (KB). Objective: To assess and apply continuous midwifery care to Ny. R Age 29 G1P0A0 at UPT Puskesmas Bayan according to the standard of midwifery services for pregnant women, maternity, postpartum, and newborns with reference to KEPMENKES No. 938/MENKES/SK/VII/2007 concerning Standards of Midwifery Care. Method: SOAP analysis (subjective data, objective, assessment, planning). Result : Mrs. R, age 29, normal pregnancy, normal and spontaneous delivery, no complications for mother and baby, midwifery care for newborns and postpartum mothers went well without complications, neonate was normal, and family planning midwifery care (KB) was administered. 3 months. Conclusion: Continuous Midwifery Care for Mrs. R aged 29 years at the UPT Puskesmas Bayan has been carried out according to the standard of midwifery services for pregnant women, maternity, postpartum, newborn, and family planning with reference to KEPMENKES No. 938/MENKES/SK/VII/2007 concerning Standards of Midwifery Care.
