ABSTRACT

Background: Cases of sexual abuse among children and adolescents continue to occur in Sleman Regency. This condition highlights the need to strengthen adolescents' attitudes toward the prevention of Child sexual abuse (CSA). This study aimed to describe adolescents' attitudes toward CSA prevention at SMP N 1 Mlati Sleman.

Methods: This descriptive quantitative study employed a cross-sectional design and involved 242 respondents selected using total sampling. Data were collected through a closed-ended questionnaire and analyzed using univariate analysis.

Results: Most adolescents demonstrated positive attitudes toward CSA prevention. Positive attitudes were more commonly found among female adolescents, those living with their parents, those exposed to information through media, and those who interacted with peers.

Conclusion: Most adolescents had positive attitudes toward CSA prevention, although negative attitudes were still identified among some respondents. Therefore, strengthening educational efforts through schools, families, peers, and information media is needed to improve adolescents' attitudes toward CSA prevention.

Keywords: adolescents, Child sexual abuse , attitudes

ABSTRAK

Latar Belakang: Kasus kekerasan seksual pada anak dan remaja di Kabupaten Sleman masih terjadi setiap tahun. Kondisi ini menunjukkan perlunya peningkatan sikap remaja dalam pencegahan *Child sexual abuse* (CSA). Penelitian ini bertujuan mengetahui gambaran sikap remaja tentang pencegahan CSA di SMP N 1 Mlati Sleman.

Metode: Penelitian deskriptif kuantitatif dengan pendekatan *cross-sectional* dilakukan pada 242 responden yang dipilih menggunakan teknik *total sampling*. Data dikumpulkan menggunakan kuesioner tertutup dan dianalisis secara univariat.

Hasil: Sebagian besar remaja memiliki sikap positif terhadap pencegahan CSA. Sikap positif lebih banyak ditemukan pada remaja perempuan, remaja yang tinggal bersama orang tua, terpapar media informasi, dan memiliki interaksi dengan teman sebaya.

Kesimpulan: Sebagian besar remaja memiliki sikap positif terhadap pencegahan CSA, meskipun masih ditemukan sikap negatif pada sebagian responden. Oleh karena itu, diperlukan penguatan edukasi melalui sekolah, keluarga, teman sebaya, dan media informasi.
